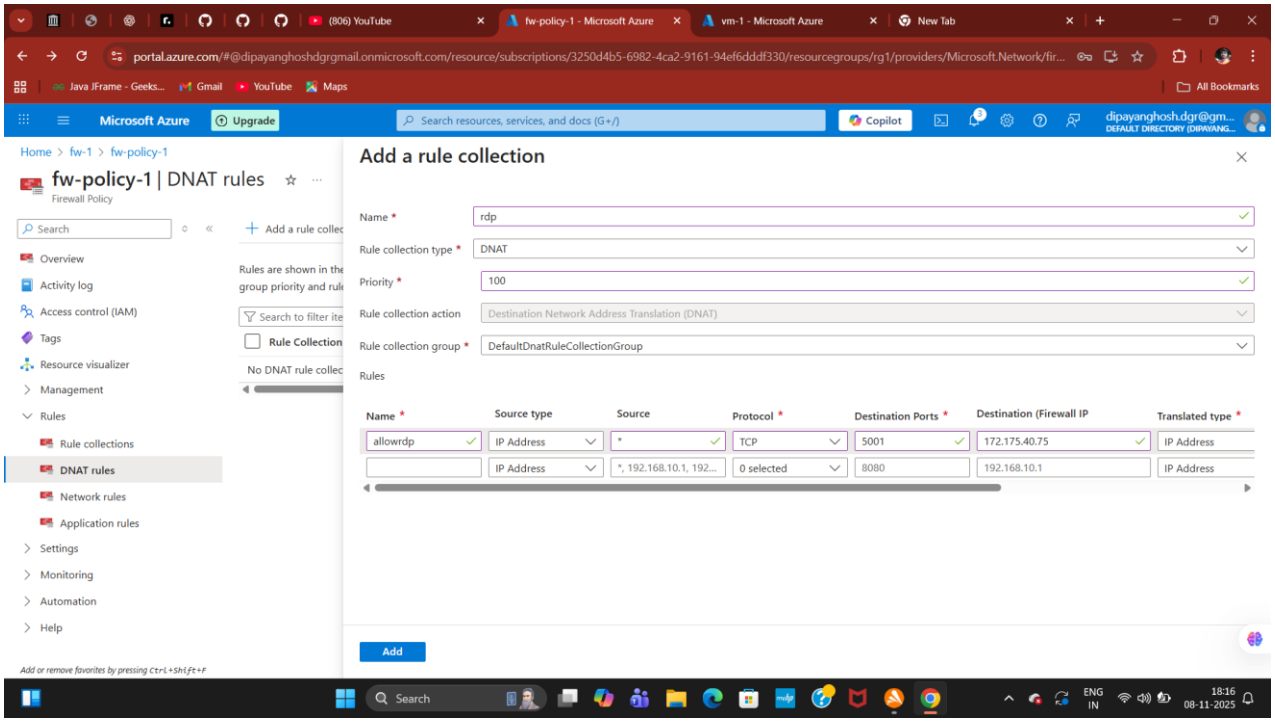
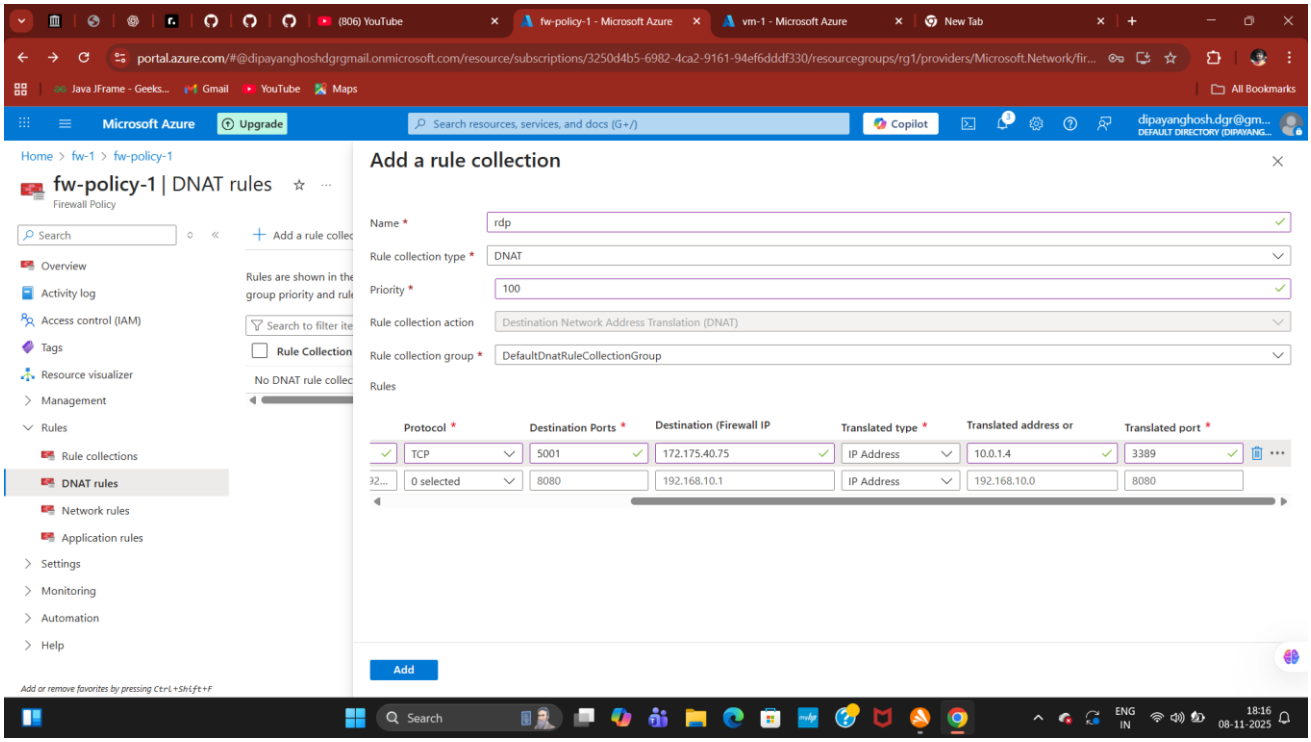
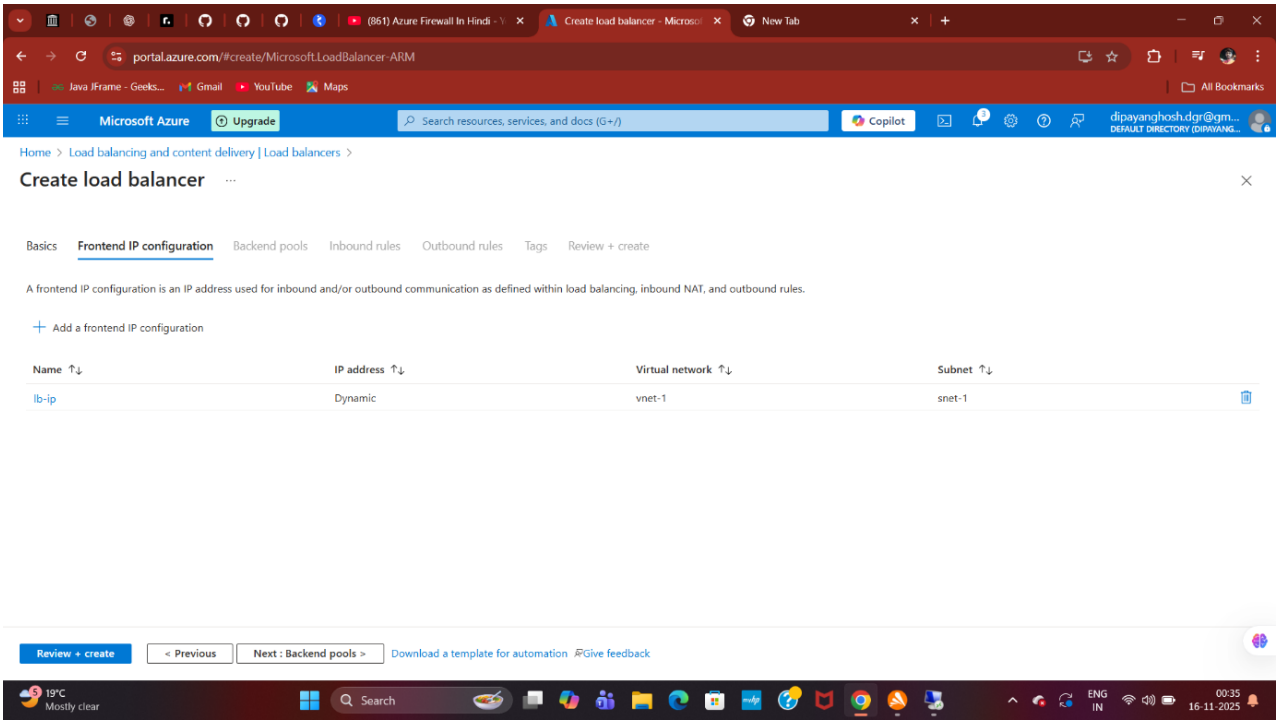
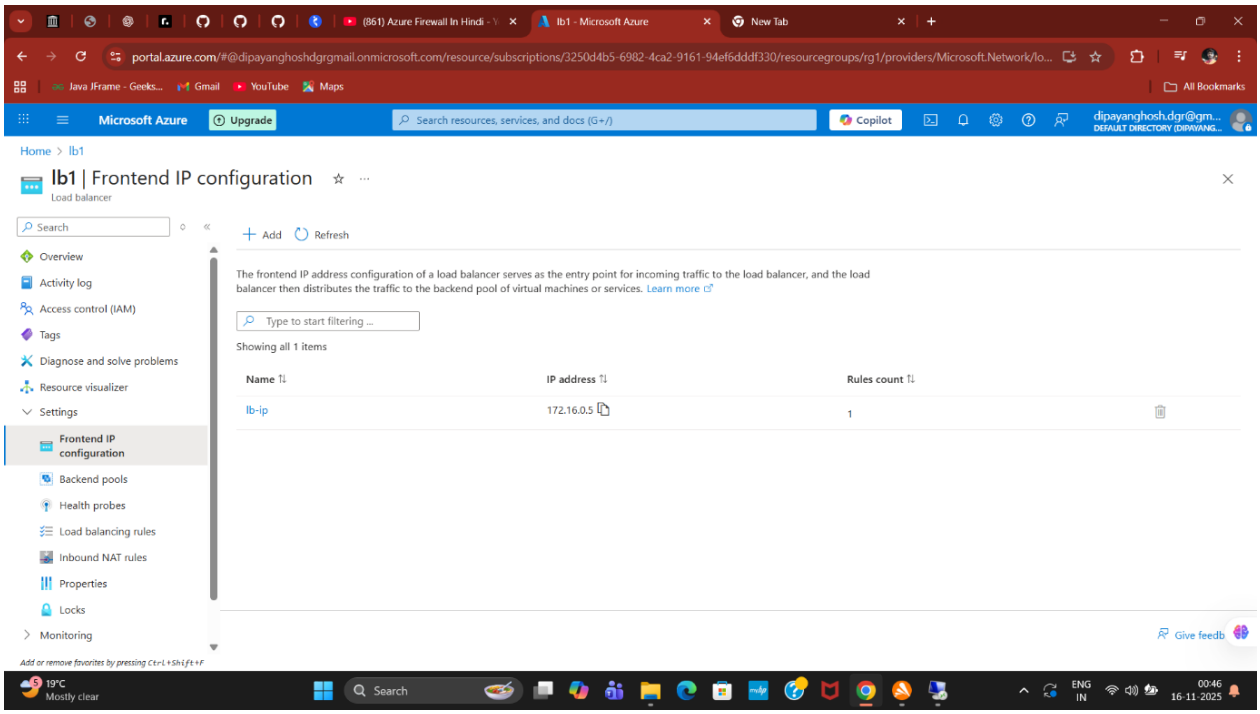
Adding DNAT rules for RDP through Azure Firewall



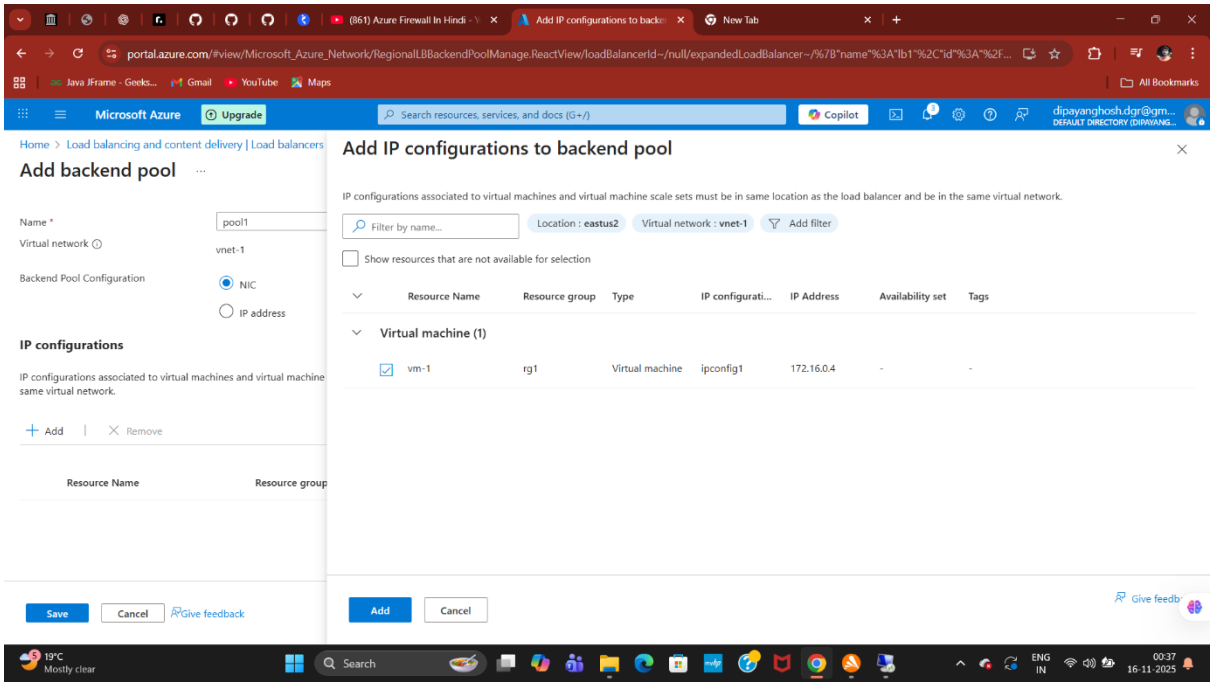


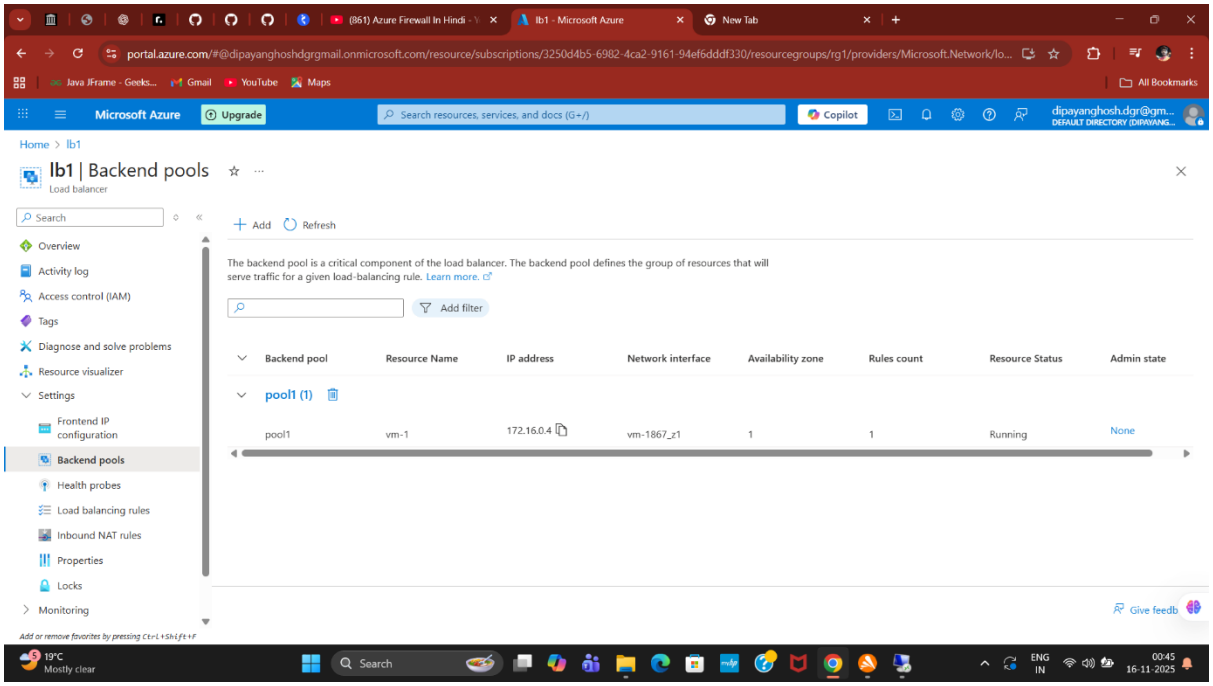
Load Balancer Frontend IP Configuration



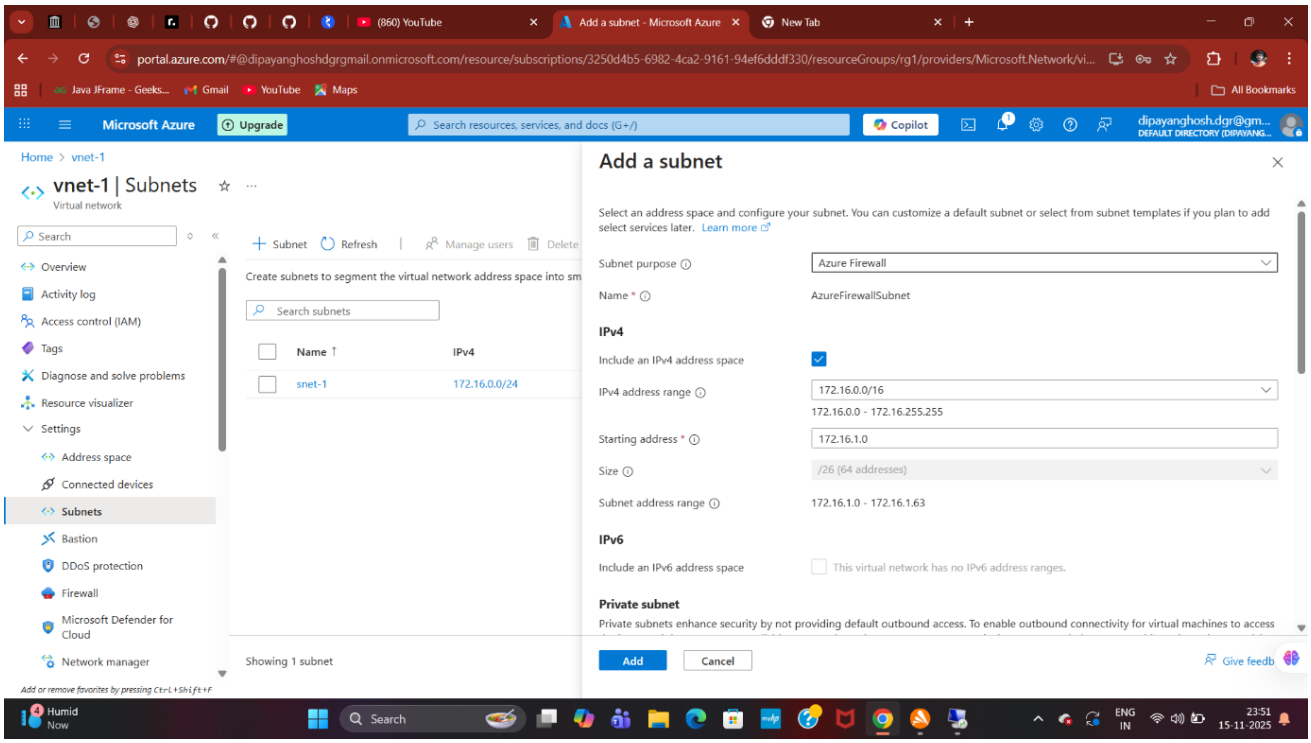


Load Balancer Backend Pool Configuration

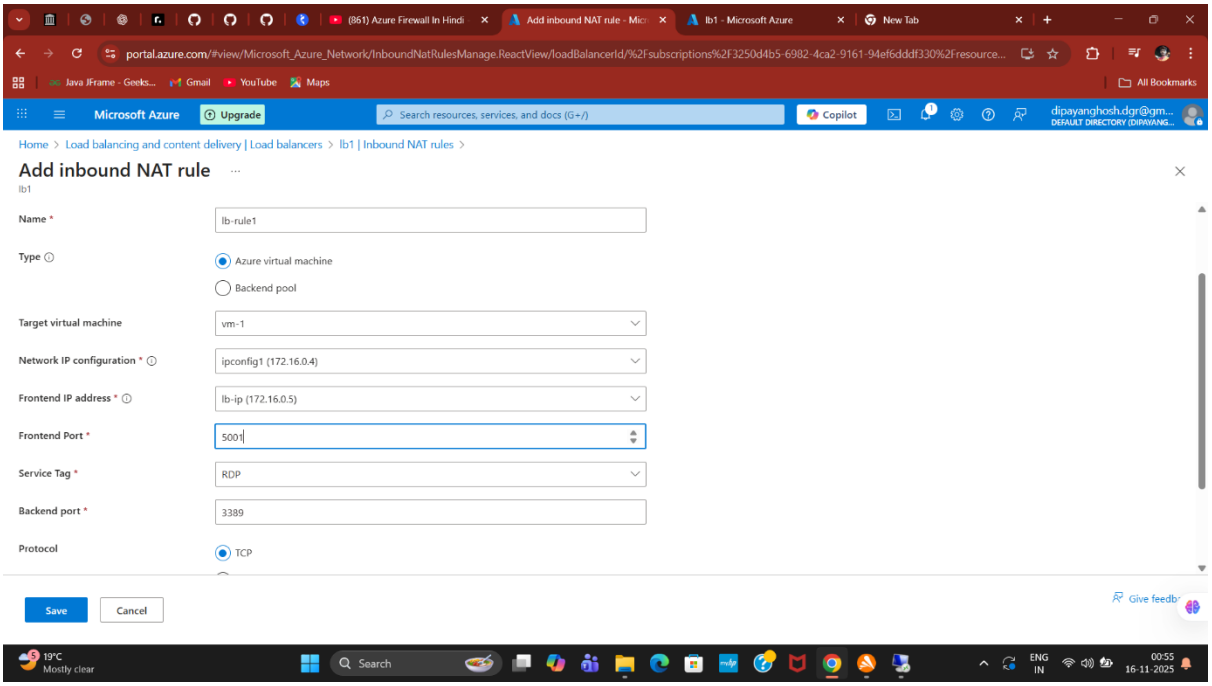


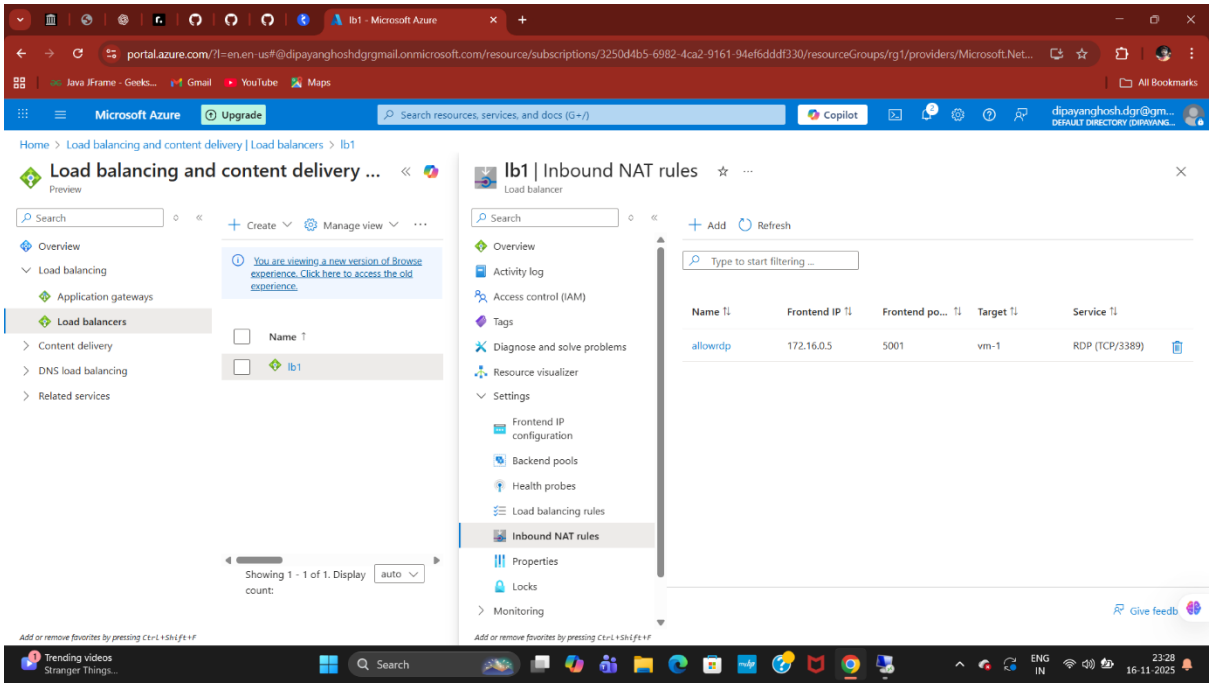


Azure Firewall Subnet Configuration

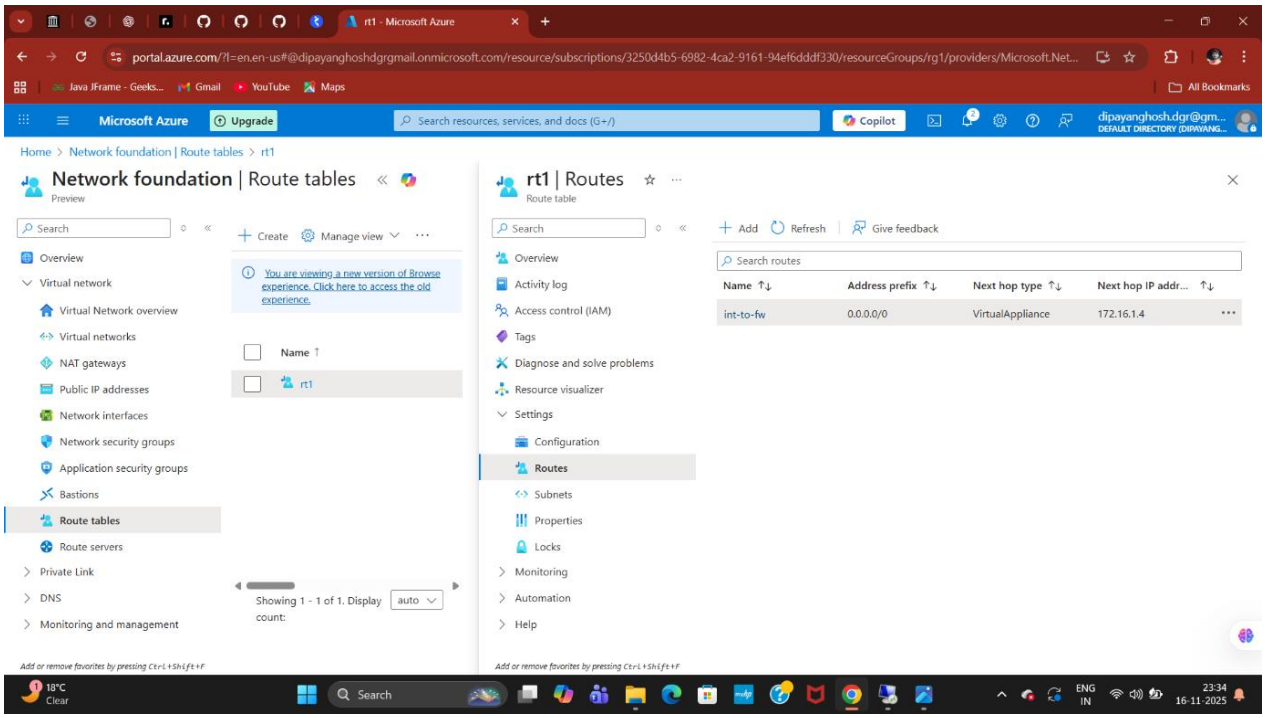


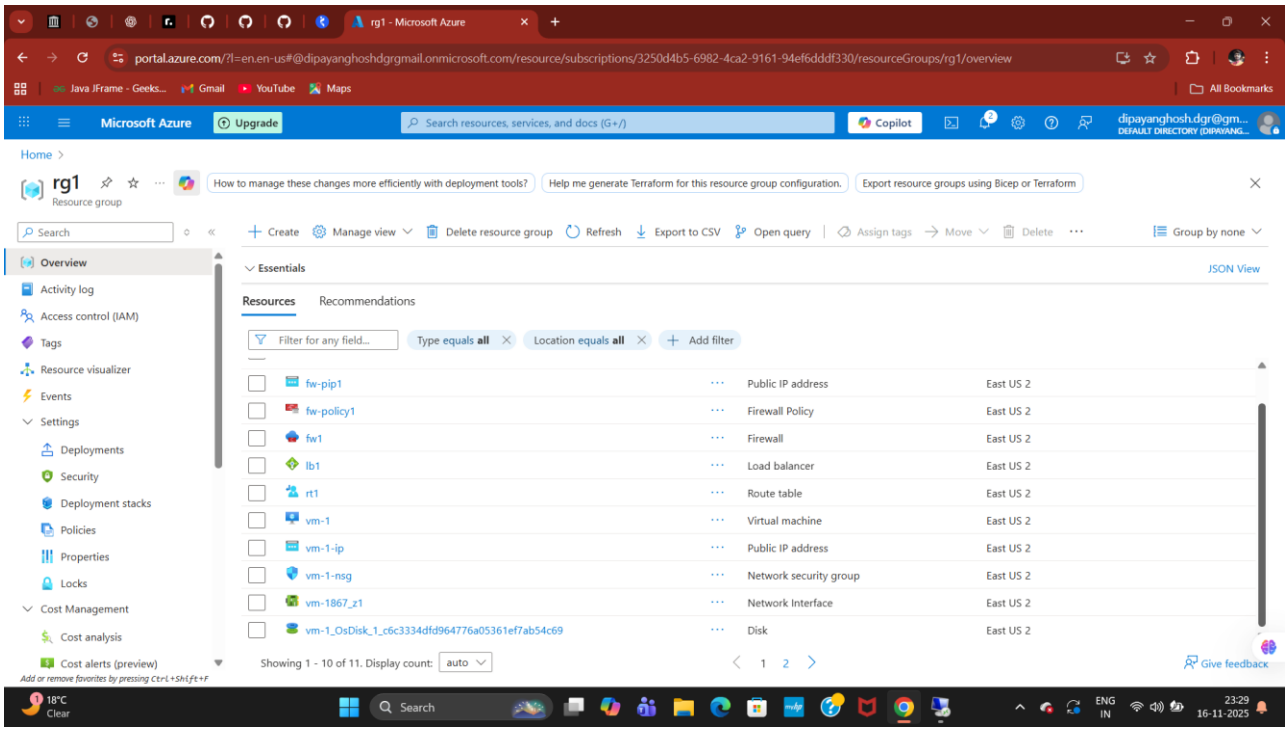
Load Balancer Inbound NAT Rule Configuration



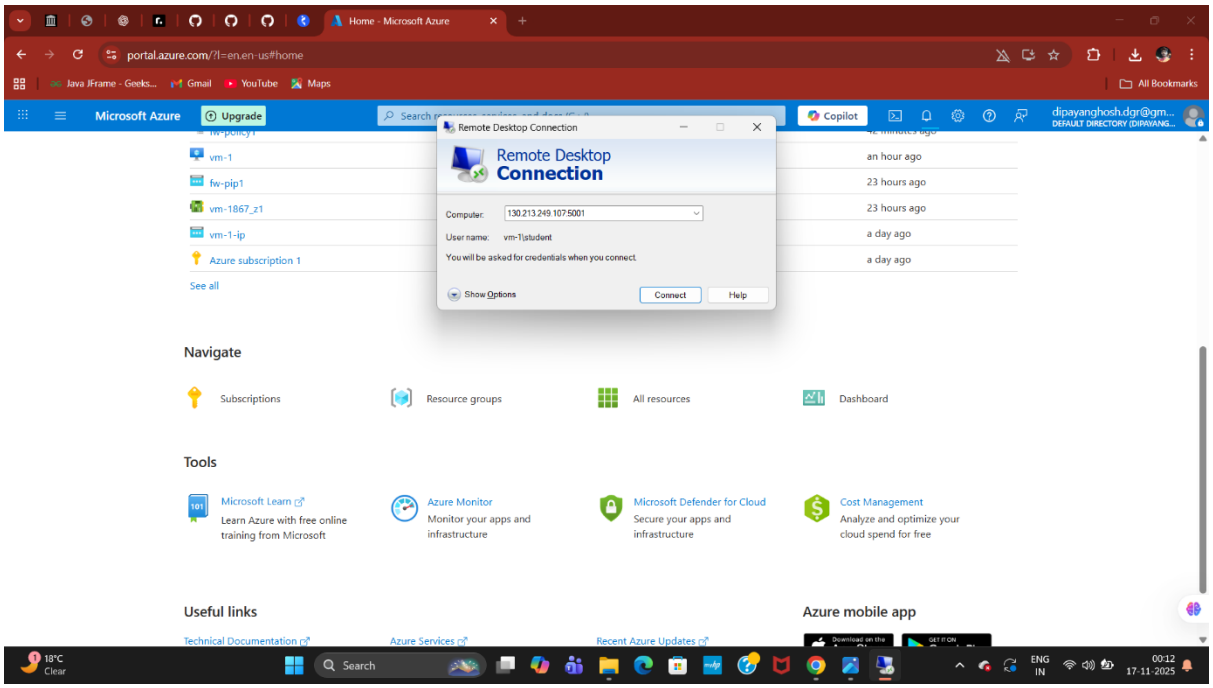


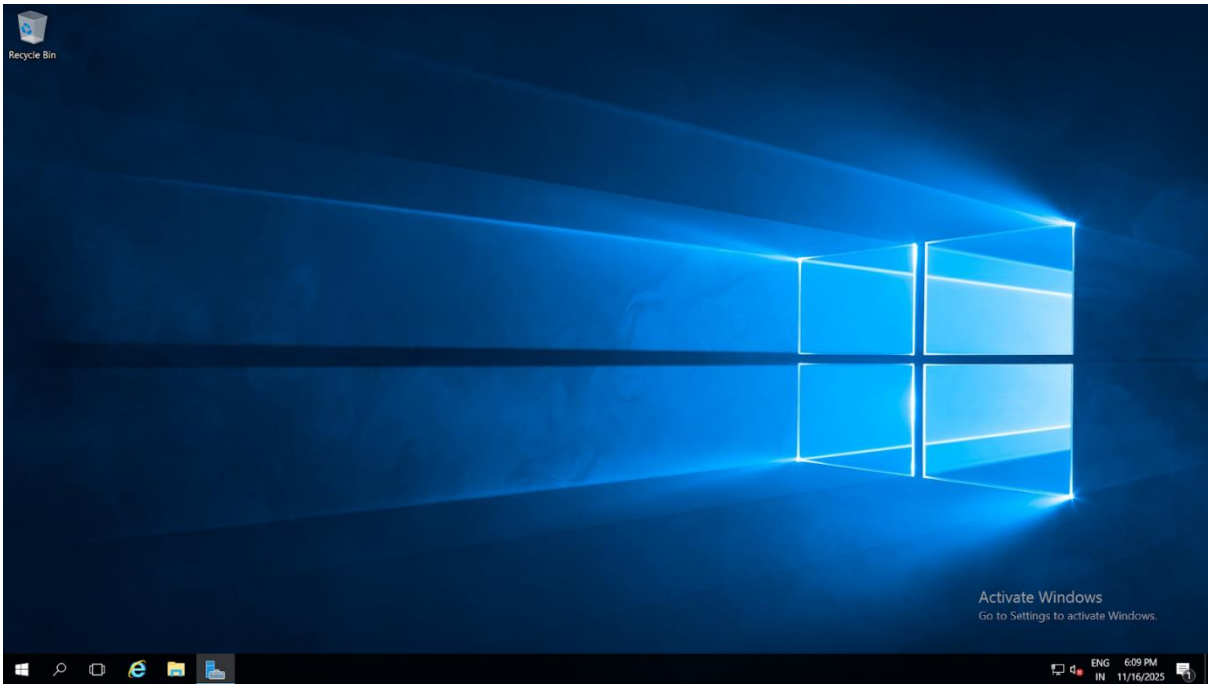
User Defined Route Table and Resouce Group

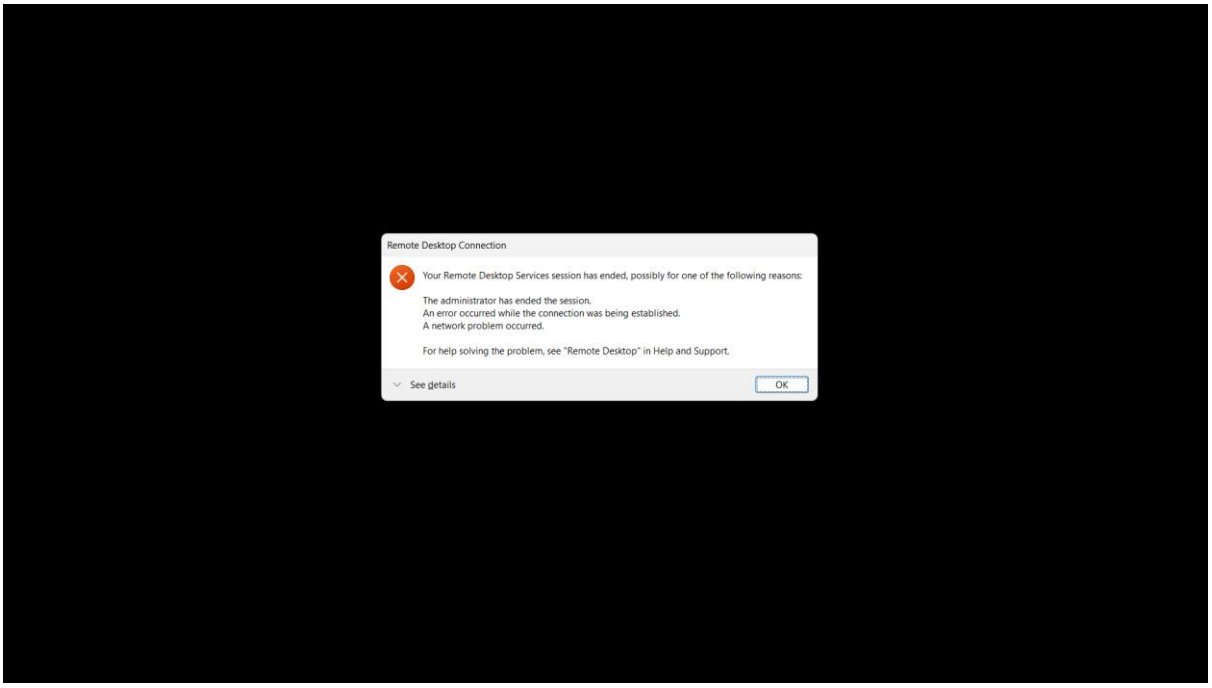




Remote Desktop Connection







Remote Desktop Connection
Your Remote Desktop Services session has ended, possibly for one of the following reasons:
The administrator has ended the session.
An error occurred while the connection was being established.
A network problem occurred.
For help solving the problem, see "Remote Desktop" in Help and Support.
